Recipient Quarterly Reporting Instructions  
September 27, 2010 – changes are identified in red**

The following information is provided to assist NSF recipients in consistent and quality data quarterly reporting under ARRA. This chart provides a cross-walk of the data elements listed in the Recipient Reporting Data Model issued by OMB in the [Final Production Release v.4.0. Guidance](#). The data model, however, has been modified to include only those data elements that are applicable to NSF assistance awards. In an effort to ensure data quality and to assist recipients in reporting accurate data for ARRA quarterly reports, NSF is providing additional information, where appropriate, for use by the recipient. Following this additional guidance will assist NSF in reviewing recipient reports. As new information becomes available, this document will be updated accordingly.

Many of the data elements that are required to be submitted in the quarterly recipient reports can be found on Research.gov, ([www.Research.gov](http://www.Research.gov)) using the Research Spending and Results Service. From the main page of Research.gov, click the Research Spending and Results link to navigate to the search page. Type in the applicable Award ID Number into the Awardee or Award Information box and click Search. A [help sheet](#) that illustrates the location of many of the requisite responses is available for use by the recipient community.

An estimate of the combined number of jobs created and jobs retained funded by the Recovery Act during the current reporting quarter in the United States and outlying areas.</p> <p>For grants and loans, the number shall include the number of jobs created and retained by sub recipients and vendors. The number shall be expressed as "full-time equivalent" (FTE), calculated cumulatively as all hours worked divided by the total number of hours in a full-time schedule, as defined by the recipient or federal contractor. For more information on how to perform this calculation, please <a href="http://www.whitehouse.gov/sites/default/files/omb/assets/memoranda_2010/m10-08.pdf">OMB Memorandum M-10-08</a>, found at <a href="http://www.whitehouse.gov/sites/default/files/omb/assets/memoranda_2010/m10-08.pdf">http://www.whitehouse.gov/sites/default/files/omb/assets/memoranda_2010/m10-08.pdf</a>. grant period or employment period begins. For example, if an employee charges 100% effort on a project for one month but zero effort the other two months (either because no work was performed, or even if the grant was not yet awarded), then that should be reported as 0.33 (1 month worked out of 3 months elapsed) full time equivalents during the three month reporting period.

Job estimates also will be reported:  
For all reporting periods that the grant is active. For example, if a researcher provides 100% effort in the grant's first quarter and 50% effort in the grant's second quarter, the recipient report for the first quarter will reflect 1 FTE and the second will reflect 0.5 FTE.

Recipients are advised that if an individual works on the NSF funded project, and the recipient charges associated personnel costs to the ARRA project, this should be reported as a job retained (or created if hired specifically to support the project.)

Given the nature of NSF projects, NSF does not anticipate the need for use of any statistical methodology to generate an estimate of job impact. Therefore, use of statistical methodology for generating estimates of job impact is not permitted.

									For those recipients with a Graduate Research Fellowship Program (GRFP) award, please enter a value of the total award amount divided by \$121,500.
